**Annual Review
59th Annual General Meeting
30th September, 2024**

Dear Members/ Colleagues

On behalf of members of the Executive Committee and myself, I welcome all the participants at the 59th Annual General Meeting which has been convened to review the salient features of the year ended September 30, 2024. Allah (SWT) has been very kind who guided and provided me an opportunity to lead the Association at difficult times. I have made my best endeavors in the capacity of chairman PSMA to communicate the view point of the Sugar Industry at various forums including print media and electronic media effectively and forcefully. Here I would like to extend my sincere gratitude to my colleagues for the unwavering support extended by them. I really feel honored to have worked with such a professional and dedicated team. Your cooperation has always been a source of inspiration which enabled us to overcome various challenges that confronted us during this period.

Now I will present the Annual Review for the year ended on 30th September, 2024.

Area Under Sugarcane Cultivation and Production of Sugarcane

The year under review had many ups and downs. Area under cultivation of Sugarcane crop in 2022-23 was 1,318,143 hectares which in 2023-24 decreased by about 10.51%, however, due to exceptionally good yield per acre achieved by the farmers all over Pakistan sugarcane production remained slightly better than last year. In Punjab Province, area under sugarcane cultivation and production of cane crop were reduced by 14.71% and 5.41% respectively whereas in Sindh Province, although sugarcane area decreased by approx. 1.45%, however production of sugarcane crop

increased by 18.33%. In Khyber Pakhtunkhwa Province, area and sugarcane production both increased by 4.02% and 6.49% respectively.

During this year, as per reports of Provincial Cane Commissioners, Cane crushing in Punjab increased by 1.04% whereas sugar production decreased by 2.52%. In Sindh, Cane crushing and sugar production increased by 14.83% and 15.90% respectively. In Khyber Pakhtunkhwa Province, Cane crushing and sugar production remained 8.22% and 13.19% respectively less than that of previous year.

During the year under review, the overall average sucrose recovery achieved on Pakistan basis was 10.00% which remained lower than the preceding year's recovery rate of 10.19%. So, despite reduction in area under cultivation as well as declining trend in sucrose recovery the actual sugar production achieved this year was more than last year attributable only to better yield per acre achieved.

Sugar Stocks

This year sugarcane crushing started in last week of November, 2023. We started the year with a surplus of 700,818 tons of sugar and produced 6,843,819 tons of sugar, out of which 80,833 tons was produced from beet. In the month of November, 2023, 429,048 tons of sugar was lifted whereas from 1st December 2023 to 15th September, 2024, 5,121,362 tons of sugar net of sugar export was lifted and consumed internally with average monthly consumption of 539,090 tons. In the current year, Economic Coordination Committee (ECC) of the cabinet initially allowed export of 150,000 tons of sugar. Till the finalization of this review, 133,152 tons of sugar has been exported from Punjab & Sindh Provinces. As of 15th September, 2024 remaining sugar availability in the country is 2,290,123 tons. Keeping in view the pattern of current lifting, which has substantially reduced, sugar stocks would be sufficient until January, 2025.

Sugar Export

In various meetings of Sugar Advisory Board, PSMA persistently highlighted that since the international price of sugar was higher than the domestic price and the sugar stocks are surplus after meeting country's internal requirement, therefore, the Government may allow the industry to export surplus sugar so that foreign exchange could be earned for the country. On continuous persuasion of PSMA, Government allowed export of 150,000 M. Tons of sugar as against projected surplus of 1.5 million tons with certain conditions. Allocation of sugar export quota among provinces was made based on last year's sugar production by each province which worked out 64% for Punjab, 30% for Sindh and 6% for KPK. KPK Govt for unknown reasons did not allow sugar export from the province so quota allocated to KPK will remain unutilized. Not only KPK Govt disallowed sugar export, it also imposed 2% export development surcharge on all exports through KPK. However, PSMA suggested that following amendments be incorporated while granting permission for export of sugar in future.

- a. Shipment of sugar for export be allowed within sixty (60) days instead of forty-five (45) days from the date of allocation of export quota by respective cane commissioners as considerable time is wasted in procedural delays.
- b. Ex-mill sugar price bench mark may be increased due to increase in withholding tax U/S 236 (G) from 0.20% to 2.00%. Its net impact on sugar prices is estimated at 1.8% i.e., app. Rs. 2.50 per kg.
- c. Exports proceeds may be allowed to be received in advance in case of Afghanistan through banking channels while export proceeds in case of LCs be allowed within a period of sixty (60) days of opening of LCs for export to other destinations.
- d. State Bank of Pakistan may be requested to advise all banks to accept export proceeds from third parties for export to Afghanistan.

e. The condition of linking export with bench mark retail price of sugar may be waived off as maintaining retail price is not within the control of sugar mills, for this matter provincial governments are responsible to take necessary measures.

During the successive SAB meetings, PSMA again requested that in view of adequate availability of stock and decreasing international price of sugar, Government may allow further export of sugar immediately.

Newly Imposed Taxes on Sugar

During the year, Government has imposed following taxes:

- ❖ Federal Excise Duty has been levied at the rate of Rs. 15 per kg on white crystalline sugar on the supply of sugar by any person to a manufacturer, processing or packaging entity. Moreover, imposition of additional Sales Tax at the rate of Rs. 2.7 per kg has resulted in a total increase in sugar prices up to Rs. 7.70 per kg.
- ❖ Advance tax rates on sale to dealers, distributors, wholesalers and retailers have also been enhanced under section 236G and 236H of Income Tax Ordinance, 2001.
- ❖ Withholding Income tax U/S 236-G has been increased from 0.20% to 2.00%. Its net impact on sugar prices is 1.8% i.e. approx. Rs. 2.50 per kg which could not be passed on to consumers due to surplus sugar stocks in the country.

Issues highlighted

In various meetings of Sugar Advisory Board, PSMA has highlighted the following issues:

- a) The sugar industry is massively over-regulated by the provincial and Federal Governments. Whenever there is a surplus sugar production in the country, there is no proper mechanism to assess this surplus and take timely decision for

exports. In prior years, country lost huge foreign exchange due to late and inadequate export permissions given by the federal government. Govt takes very late decisions which results in crash of sugar prices and sugar mills have to sell its product below cost and suffer heavy losses.

- b) Despite suffering huge losses in billions due to increased production cost and expense of maintaining surplus stocks the sugar industry is striving to meeting the expectations of the government, local consumers and sugarcane farmers. However, the ongoing and significant losses are becoming increasingly unmanageable for the industry.
- c) Pakistan has the lowest per acre yield of sugarcane. Provincial governments do not extend any support to eliminate non-variety sugarcane rather support is provided to the farmers to sell their low-quality sugarcane to the millers causing heavy production losses to the millers.
- d) Clearing surplus stock is in the national interest to make space for new seasons' production. Any delay in granting permission for export of sugar will harm both industry and the farmers, in addition to depriving the country of much needed foreign exchange.
- e) Industry produces sugar within a span of four months and sells the same in twelve months. As no strategic reserves are maintained by the Federal and Provincial Governments, heavy carrying cost has to be borne by the industry.
- f) Sugar is the only consumable item from agriculture produce on which Government charges 18% sales tax whereas there is no sales tax on Rice, Wheat flour, Maize, Vegetables and Fruits etc. Also, this is the only industry which is being regulated whereas all other businesses are working under free market mechanism.
- g) Unofficial ban on inter provincial movement of sugar may not be imposed. In the previous years, sugar supply to deficient

provinces i.e. KPK and Baluchistan was restricted in the name of smuggling control. Resultantly people of these provinces had to buy sugar at higher prices as compared to Sindh and Punjab.

- h) Federal Government on recommendation of PSMA has been successful in controlling smuggling of sugar since September, 2023 but has been totally unsuccessful in channelizing it through official sources by not giving permission for export for the quantity which was saved from smuggling which has resulted in crashed of sugar prices in the local market.
- i) At present Pakistan has the lowest sugar retail prices in the world including Brazil, the largest sugar producer in the world. This has happened only because of surplus sugar in the country as a result of effective check on smuggling last year. Sugar industry is being financially squeezed by not letting it to achieve even break-even prices which will have serious consequences to be faced by farmers and FBR.

Recommendations put forth by PSMA

- It has been impressed upon by PSMA that Government may initiate process of de-regulating this industry. Govt has always aimed at regulating sugar industry which has not worked over the years and is a stumbling block in the growth of sugar industry. Let the market forces determine commodity prices based on the supply and demand mechanism. Import and export of sugar may be allowed and let the industry work at free market mechanism. So complete deregulation of the sugar industry is the only way forward to bring efficiency in this sector, however government may monitor sales tax & income tax evasions, smuggling, hoardings and other malpractices, if any.

- Last year Government announced the support price of sugarcane ranging from Rs. 400 to Rs. 425 per 40 kg. However, in some areas, sugarcane was provided to the mills at higher rates by the farmers. In order to address this anomaly, PSMA requested the Government to devise some mechanism whereby supply to the mills at fixed rate could be ensured.
- Crushing season 2024-25 should not commence before 30th November, 2024 to avoid sugar production losses of 250k to 300k tons. The earlier we start; the less sugar will be produced. Considering bumper crop in the country next year, there is no need to crush premature sugarcane.
- In order to provide level playing field to tax compliant sugar mills, increase in FBR revenues and availability of reliable data, the Track & Trace System (TTS) has to be continued and implemented by making it more effective and successful.
- We have clearly mentioned that control of Retail prices of sugar is the responsibility of Government and PSMA has nothing to do with it.

Future Scenario

As per first estimates for the year 2024-25, area utilized for sugarcane crop is more than that of last year. Likewise, sugarcane production will also be increased. Thus, bumper sugarcane crop is expected for the next crushing season, sugar production may range from 7.0 to 7.5 million tons which will create another surplus of app. 1.5 million tons. Since we are sitting in front of crushing season 2024-25, therefore, Government can comfortably take decisions to export large quantity of sugar to get rid of surplus in hand. Therefore, permission for export of further five hundred thousand million tons may be granted immediately to save farmers as well as sugar mills which will ensure timely start of new crushing season.

Annual Report 2024

Before winding up this review, I would like to thank all of you once again for your valuable suggestions and contributions made during this period.

I wish that Allah may bless you all with complete health and happiness.

Allah Hafiz.
